

Exhaustion

EMERGENCY:
CALL **911** IF

- You are losing control or are thinking about harming yourself.
- You have trouble breathing.
- You have chest pain.
- You are confused or are exhibiting unusual behaviors.

When to seek professional help

- You always feel tired and are not improving despite sleeping at night.
- You have headaches, dizziness or unusual pains in addition to fatigue.
- You have trouble performing your everyday tasks both at home and at work.
- You have lost or gained weight for no reason.
- You have trouble sleeping, you feel sad or angry.

How to get help

- 24/7, dial **811** option 2
- Go to a CLSC
- Go to the allermieuxamafacon.ca website
- Call your pharmacist
- Make an appointment with your doctor
- If you do not have a doctor, dial **811** option 3

This booklet is not intended to replace the advice of a medical professional, nor is it intended to be a substitute for medical care.

Exhaustion is an extreme state of physical and mental fatigue. It occurs when the body is no longer able to recover.

Self-care

Rest: Sleep or relax somewhere quiet.

Diet: Drink water regularly and snack on things such as fruits, vegetables and nuts. Avoid alcohol and limit coffee.

Screens: Take a break from your phone, computer and television. Use your screen time to focus on your well-being by going to sites such as Getting better my way.

Relaxation: Go for a walk or meditate.

Help: Ask a loved one for help or call 811, option 2.
